A really impressively put together system that looks good, plays smoothly and gives you access to some triple A board games for a modest initial fee. I know the model is slated to be subscription based but not sure exactly how that will work yet and in the interim, I will surely get my moneys worth on what it has to offer already.

I am a solo player mainly and this system lets you play everyone's "turn" if you wish and it saves where you left off in the gaming room for when you come back (needed for some of the bigger games). I could set up a private game room so I wasn't disturbed and whilst I guess this is maybe not the primary selling point here, something that appeals to me.

I bought and am using this on my laptop whilst away from my home base using a "dongle". I only dropped connection once and it went back in quickly where I left off. Since then, it has worked seamlessly.

So, overall, I fully endorse this game based on my very early impressions and as a Boardgamegeek, I can only hope the number of games available will continue to grow.. Really good fighting game

Pros:

- High-quality graphics
- Good animations
- Quite realistic fights

Minuses:

- No gamepad support
- Enemy models are the same. it doesn't even load.. It is an amazing strategy game were you take command of a species to lead them to galactic victory. It has a very well designed economic system, a clean unhappiness system, and an amazing diplomacy system, even with AI. There is, however, one MAJOR flaw. The game has a bug where : If you attack an enemy colony, and do not choose to auto calculate the battle, the screen goes to the desktop except for a GUI overlay. Then, after the battle is over, and the screen will remain black with a GUI overlay. Any text or windows that appear on the black screen will stay there even after closing them. Furthermore, saving the game and rebooting it does not help. Unless you plan on victory without fighting, you simply cannot win.. Fat and unwieldy are two words to describe this game. While it uses many exotic contextual actions, dynamically grabbing pipes, ledges, and other objects in game to ascend to higher safer perches, the game just falls flat on it's face.

I believe the description of this game is a "vertical" fps, which I think they meant to show by this emphasis on climbing and acrobatics, but I think what went wrong is the aiming, which felt clunky, enemies didn't seem to die fast enough, mostly because you're flipping and climbing everywhere just trying to find the guys, and an overall unappealing level design which was consistent of mostly blank brick buildings and bridges leading to nowhere special.

If you can get over the aiming and the level design, you might be able to take this game. But given the size of the game, I feel like I could use my space better than with this game.. It's a fairly addictive, very well-made, fun, casual turn-based tactical strategy game. Get it.. buy this game if you want all your memory eaten up cause thats all it does, takes about 5 minutes to just get to the loading screen and an additional 10 minutes to start anything up at all.. I don't know what I bought this at but if it was more than a dollar I feel bad.

It's not a good game to me.

Literally all it is is pressing a spacebar while physcadelic\u2665\u2665\u2665\u2665\u2665 happens.

Please don't buy it unless you're okay with wasting a dollar. (update: I take it all back. This game is flawed and not worth the aggravation. It's bad enough that your character will go from a dead stand still to rolling off the edge without you pressing anything at all, but to expect me to dodge hornets on tiny sand blocks followed by a f*cking fire tunnel without a checkpoint after the f*cking mess that was the hornet bit?!?!?! F*ck this game.)

Good game with acceptable stupid humor. I am enjoying it and the devs take suggestions on improvement. Good going guys\gals!

SHOULD REALLY MAKE A BETTER ENGINE FOR THIS.. HEY \u2665\u2665\u2665\u2665\u2665\u2665 DO YOU EVEN KNOW WTF A PUZZLE IS??? and what were u think with making number #3? fckn idiot\u2665\u2665\u2665\u2665\u2665. Starscape is a curious fusion of an arcade and a turn-based strategy game. The arcade component is in total domination, but as long as it is not backed by strategic advancements, it tends to become overwhelmingly hard.

The main feature of the game is addictive gameplay. Despite the simple idea ("collect resources to become stronger, but watch your back and take offensive actions to collect intelligence") the gameplay is extremely immersive. The whole stroy takes ~12 hours (or less on low difficulty levels) to complete. The storyline is not bad, but not too bristling with events.

From purely technical point of view, the game mechanics is trivial: the more resources you collect, the more powerful you get; and few things can prevent you from collecting resources. Whenever you save a game, it is always easy to load and avoid any serious danger you get into. It is possible to think of circumstances resulting in 100% death, but I have never encountered such a coincidence in practice. The only thing the enemies can do is substantially delay your advance.

SUMMARY: plot is simple, but intriguing, graphics is nice, strategy is straightforward. But there is something in this game that makes it addictive and immersive. An insight into this game is highly recommended. Slightly overpriced (for a reason).. TLDR; the design leads to a frustrating and disheartening experience despite the interesting ideas.

I only played the game for 2 hours, so perhaps some of these problems aren't as bad later on or in a different mode, but here's what made me stop enjoying it:

First problem: The events of the game are very divorced from the actions the player takes, meaning there is no feeling of satisfaction from making a good choice. On top of that, the clear, quest-style method for gaining research points really doesn't mesh well with that indirect nature - it took me over half an hour to go from 7V8 to 8V8 bushes planted, with most of my commandments going into 'pick berries'.

Second problem: There are really only 4 different types of 'nouns' - food, terrain, ores and people - and only 2-3 of the verbs are relevant to the groups other than people (why would people near lions specifically attack/not-attack people near hyenas?), meaning the core gameplay gets boring pretty fast.

Third problem: it really sucks to be put into a perfect, beautiful world with no war and no problems, be given the task of keeping people with emotions and needs and autonomy safe and happy, and then slowly see the resources stripped bare, people hating and destroying things and eventually fighting among themselves, while feeling like it's both your fault and the nature of the game.

The core idea is interesting, but it doesn't fit with the game it's in, like bacon in a cake. I think if perhaps it was set up more like a puzzle game - with a dysfunctional country that you have to 'fix' through the commands - it would work a lot better.. I highly recommend this game, the replay ability is so great. the dlc is bought by IGC, the gameplay is really good, the farming is rewarding, the build system is so expensive, the game room shop is a great challenge for completionist, one downside the gameplay is the smallest bit repetitive and the small range of achievements.. very good and relaxing game, achievements work, small price, so all in one 10V10. The ambient is marvelously well crafted and there is real love put into this game, but the story makes no sense, the gameplay is full of quirks and bugs and the way the checkpoints are places are ridiculous. This might have been a great game with a bit more beta testing and bug quashing, but as it is, I feel it is not even worth the time you put into it.. There is no real challenge...
